"Mer Rouge", with its rich colors imagined straight out of the "Arabian nights tales", gives life and light to home furnishings, through a subtle graduation of colors available in tablecloths, towels, dishcloths, curtains, panels and fabric by the yard. This collection recreates a sweet exotic summer, setting your table in the same intimate tones, while inviting those who partake to travel in the mind's eye to faraway lands within the beautiful setting of your home.

« Les Mômes » is another design found in the collections of the Mulhouse museum, and interprets a popular style pattern that dates back to 1926: a couple of lively children dressed up, the boy as a foot-soldier and the girl in a traditional Breton costume, form charming scenes of country children at play.
